ELSEVIER

Bone 32 (2003) 731–736

BONE

www.elsevier.com/locate/bone

SUBJECT INDEX
for Volume 32

Acid phosphatase
Tartrate-resistant, osteoclast formation and differentiation and, 217
Adenovirus
Skin fibroblasts expressing bone morphogenetic protein effects on bone repair and, 502
Adipocytes
Noggin effects on stromal cell differentiation and, 111
Aging
Epiphyseal growth plate fusion in tibia, time course of, 261
Osteoprotegerin levels and, 681
Alendronate
Bone length and growth plate morphology effects, in osteogenesis imperfecta, 268
Amelogenin
Expression in odontoblasts, 228
Androgen receptor
Bone mineral density and, exercise effects, in middle-aged men, 412
Antibiotic prophylaxis
Gentamicin coating effects on development of implant-related osteomyelitis, 521
Apatite crystals
Organization of, in woven bone, 150
Aromatase CYP19
Bone mineral density and, exercise effects, in middle-aged men, 412
Articular cartilage
Osteoarthritis and, 284
Athletes
Elite male, peripheral bone mass modeling, dual x-ray absorptiometry assessment, 62

Bioceramics
As alternative to autologous bone graft and, 602
Bisphosphonate
Type I collagen as marker of bone resorption in osteoporosis and, 20
Bisphosphonates
Ibandronate, bone loss prevention role, after ovariectomy, 45
Osteoclasts incorporation of during bone resorption, 341
Bone
Mandible, cortical bone of, CT role in quality assessment, 35
Nonpagetic, pamidronate effects on bone density in Paget's disease and, 56
Woven, apatite crystal organization in, 150
Bone bending strength
Vibration effects on femur/tibia strength and, 69
Bone density
Growth hormone as predictor of, postmenopausal women, 434
Pamidronate effects on, in Paget's disease, 56
Bone development
Calcium and phosphorus intake variations effects on, 532
Matrix Gla protein role in bone mineralization inhibition, 201
Bone formation
Bone morphogenetic proteins role in, 381
Endochondral, perichondrium effects on chondrocytes during, 27
Insulin-like growth factor, skeletal unloading effects on resistance to, 669
Vibration effects on femur/tibia strength and, 69
Bone grafts
Autologous, bone hybrids as alternative to, 602
Cortical, osteoclast function and, 291
Bone growth
Calcium and phosphorus intake variations effects on, 532
Estrogen effects on osteoprotegerin, RANKL, and estrogen receptor expression in osteoblasts, 136
Bone healing
Vascular endothelial growth factor expression during, 491
Bone hybrids
As alternative to autologous bone graft, 602
Bone length
Alendronate effects, in osteogenesis imperfecta, 268
Bone loss
1,25-dihydroxyvitamin D_3 and bisphosphonate role in prevention of, 397
Ibandronate role in prevention, after ovariectomy, 45
At menopause, osteoporosis development and, 357
Ovariectomy-induced, collagen type III/VI and, 652
Ovariectomy-induced, vessel morphology in tibial metaphysis during, 630
Vertebral, cholesterol role in, postmenopausal women, 8
Bone markers
Bone hybrids as alternative to autologous bone graft and, 602
Ibandronate role in changes in, 687
Bone mass
Collagen type III and, exercise effects on, 660
Estrogen role in, postmenopausal women, 185
Peak spine and femoral neck, in young women, 546
Peripheral, elite male athletes, dual x-ray absorptiometry assessment, 62
Preservation of, vibration effects on femur/tibia strength and, 69
Transforming growth factor-β1 and, 297
Bone matrix
Mineralization degree, bone mechanical competence determination and, 316
Bone metabolism
Herbs, essential oils, and monoterpenes modulation of, 372
Osteoprotegerin levels, age effects on, 681
Silicon deficiency and, 127
Bone mineral density (BMD)
Androgen receptor, aromatase CYP19, estrogen receptor α gene association with, exercise effects, middle-aged men, 412
Bone loss, ibandronate role in prevention of, after ovariectomy, 45
Breast cancer risks and, 211
Longitudinal changes during pregnancy, 449
Nitric oxide effects on, in estrogen deficiency-induced osteopenia, 142

8756-3282/03/$ – see front matter © 2003 Elsevier Science (USA). All rights reserved.
doi:10.1016/S8756-3282(03)00181-9

Osteoporosis fracture and, *COL1A1* Sp1 polymorphism relation to, meta-analysis, 711
Osteoprotegerin levels, age effects on, 681
Peripheral bone mass modeling in elite male athletes, dual-energy x-ray absorptiometry, 62
Simvastatin effects, hypercholesterolemic postmenopausal women, 427
Tibial, as predictor of joint space narrowing at mediofemorotibial compartment in knee osteoarthritis, 541
Trp16Ser variation in gonadotropin-releasing hormone signal peptide association with, 185

Bone mineralization
Bone nodules in bone marrow stromal cells and, 252
Density distribution, in cancellous bone, 316
Matrix Gla protein role in inhibition of, 201
$1,25(OH)_2D_3$ effects on, in carbon tetrachloride-induced liver cirrhosis, 275
Vertebral bone fragility and bone formation rate effects on, 311

Bone minimodeling
In trabecula, 163

Bone morphogenetic protein-4
Bone fracture repair induced by, 591

Bone morphogenetic proteins
Bone formation and, 381
Expression in extracorporeal shock wave-promoted healing of segmental defect, 387
Noggin effects on stromal cell differentiation and, 111
Skin fibroblasts expressing, bone repair promotion effects, 502

Bone nodules
In bone marrow stromal cells, characterization of, 252

Bone nonunion
Bone marrow stromal cells and, 252

Bone remodeling
Trabecula, during bone histomorphometry, 163

Bone repair
Extracorporeal shock wave role in, 387
Skin fibroblasts expressing bone morphogenetic protein promotion of, 502

Bone resorption
Herbs effects on, 372
IL-6 and IL-11 influence on, 1
Osteoclast incorporation of risedronate during, 341
Osteoclasts and, receptor activator of nuclear factor κB ligand role, 581
Protein kinase C-β role in osteoclast differentiation and function and, 217
Type I collagen α1 helicoidal peptide as marker of, in osteoporosis, 20

Bone size
Quantitative genetic study of, osteoporosis risk factors and, 191

Bone strength
$1,25(OH)_2D_3$ effects on, in carbon tetrachloride-induced liver cirrhosis, 275

Bone structure
Hormone replacement therapy association with, postmenopausal women, 704

Bone turnover
Markers of, ibandronate role in changes in, 687
Mechanical loading effects during, 350
$1,25(OH)_2D_3$ effects on, in carbon tetrachloride-induced liver cirrhosis, 275
Transforming growth factor-β1 and, 297

Breast cancer
Risks of, bone mineral density and, 211

Calcium
Dietary, vitamin D and, effects on fracture risk in osteoporosis, 694
Phosphorus and, intake variations, growth and bone development effects, 532

Calvaria
Gene expression during osteoblast differentiation and, 474

cAMP early repressor
CAMP-protein kinase A signaling pathway and, in osteoblasts, 483

Cancellous bone
Anabolic action of parathyroid hormone on, 513
Bone mineralization density distribution in, 316
Epiphyseal growth plate fusion in tibia, time course of, 261
Femoral neck, in coxarthrosis, 86
Mineralization of, vertebral bone fragility and bone formation rate effects on, 311

Carbon tetrachloride
Liver cirrhosis induced by, $1,25(OH)_2D_3$ effects on bone turnover, mineralization, and strength, 275

Cardiac transplantation
Vertebral fracture prevalence after, osteoprotegerin as bone density determinant, 96

Cholesterol
Changes, in Paget's disease treated with pamidronate, 15
Vertebral bone loss in postmenopausal women and, 8

Chondrocytes
Perichondrium effects on, during endochondral bone formation, 27

Chorioallantoic membrane
Perichondrium effects on chondrocytes during bone formation and, 27

Circadian rhythm
Parathyroid hormone pattern, activity, and effects on adult growth hormone deficiency and, 170

Cirrhosis, liver
Carbon tetrachloride-induced, $1,25(OH)_2D_3$ effects on bone turnover, mineralization, and strength, 275

Collagen, type I
As marker of bone resorption in osteoporosis, 20
Synthesis, orthosilicic acid stimulation of, 127

Collagen, type III
Bone mass and, exercise effects on, 660

Collagen, type III/VI
Bone loss induced by ovariectomy and, 652

Collagen fibril
Organization of, in woven bone, 150

Computed tomography
Cortical bone of mandible, quality assessment of, 35
Peripheral quantitative, heritable components of periosteal circumference, 554

Connectivity
Femoral neck cancellous bone increase and, in coxarthrosis, 86

Cortical bone
Anabolic action of parathyroid hormone on, 513
Grafting, osteoclast function and, 291

Coxarthrosis
Femoral neck cancellous bone increase in, 86

Cytokines
Bone hybrids as alternative to autologous bone graft and, 602
Noggin effects on stromal cell differentiation and, 111

Dentin
Amelogenin expression in odontoblasts and, 228

Deoxypyridinoline
$1,25(OH)_2D_3$ effects on bone turnover and strength in carbon tetrachloride-induced liver cirrhosis, 275

Dexamethasone
Bone nodules in bone marrow stromal cells and, 252

Differentiation
Osteoblasts, fluid flow shear stress effects on, 241
1α,25-Dihydroxyvitamin D_3
Receptor activator of nuclear factor expression and, 621
1,25-Dihydroxyvitamin D_3
Bone loss and autoimmune encephalomyelitis prevention and, 397
Dual-energy X-ray absorptiometry
Peripheral bone mass modeling in elite male athletes and, 62

Editorial
Too much medicine? Or too little?, 327
Efficacy
Ibandronate efficacy in osteoporosis prevention/treatment, in postmenopausal women, 421
Electron microscopy
Vertebral fracture and bone mineralization levels and, 311
Enamel
Amelogenin expression in odontoblasts and, 228
Encephalomyelitis
Autoimmune, 1,25-dihydroxyvitamin D_3 and bisphosphonate role in prevention of, 397
Epidemiology
Fracture risk predictors, in postmenopausal women, 78
Essential oils
Bone metabolism effects, 372
Estrogen receptor α
Bone mineral density and, exercise effects, in middle-aged men, 412
Estrogens
Bone mineral density, breast cancer risk and, 211
Effects on osteoprotegerin, RANKL, and estrogen receptor expression in osteoblasts, 136
Osteopenia induced by deficiency of, nitric oxide effects on bone mineral density in, 142
Ovariectomy-induced bone loss, vessel morphology in tibial metaphysis during, 630
Skeleton responsiveness to mechanical loading and, females, 642
Type I collagen as marker of bone resorption in osteoporosis and, 20
Exercise
Collagen type III effects on bone mass and, 660
Extracorporeal shock wave
Bone repair role, 387

Femur
Vibration effects on strength, after ovariectomy, 69
Fracture
Discrimination of, in osteoporosis, quantitative ultrasound role in, 571
Osteoporotic, bone mineral density and, *COL1A1* Sp1 polymorphism relation to, meta-analysis, 711
Fracture healing/repair
Bone morphogenetic protein-4-induced, 591
Extracorporeal shock wave role in, 387
Fracture risk
In osteoporosis, dietary calcium and vitamin D intake effects on, 694
Pamidronate effects on bone density in Paget's disease and, 56
Predictors of, in postmenopausal women, 78

Gender
Hip strength and, elderly men/women, 561
Gene expression
Matrix Gla protein, bone mineralization inhibition and, 201
During osteoblast differentiation, 474
Gene mutations
25-hydroxyvitamin D-1α-hydroxylase gene, vitamin D deficiency rickets and, 332
Gene therapy
Bone morphogenetic protein-4, bone fracture repair induced by, 591
Genetic studies
Bone size and geometry, osteoporosis risk factors and, 191
Gentamicin
Implant coated with, effects on osteomyelitis development, 521
Glucocorticoids
Noggin effects on stromal cell differentiation and, 111
Glycoprotein 130
IL-6 and IL-11 influence on bone resorption and, 1
Gonadotropin-releasing hormone
Signal peptide, Trp16Ser variation in, association with bone mineral density, 185
Growth
Estrogen effects on skeleton responsiveness to mechanical loading and, females, 642
Growth factors
Noggin effects on stromal cell differentiation and, 111
Growth hormone
Early healing phase of osteochondral defects, 457
As predictor of bone density, in postmenopausal women, 434
Growth hormone deficiency
Adult, parathyroid hormone pattern, activity, and effects on, 170
Skeletal unloading effects on insulin-like growth factor resistance on bone formation and, 669
Growth plate
Epiphyseal, fusion of in tibia, time course of, 261
Morphology of, alendronate effects, in osteogenesis imperfecta, 268

Health care
Health-related quality of life and ambulatory care costs in osteoporosis, 718
Hedgehog
Osteoblast differentiation and, 611
Herbs
Bone resorption effects and, 372
Hip fracture
Mortality rate after, 468
Risk predictors, postmenopausal women, 78
Vertebral deformity prevalence in, 180
Hip strength
Gender, anthropometric variables, and aging effects on, elderly men/women, 561
Histomorphometry
Growth hormone effects on early healing phase of osteochondral defects, 457
Ibandronate role in bone loss prevention, after ovariectomy, 45
Ovariectomy-induced bone loss, vessel morphology in tibial metaphysis during, 630
Trabecular minimodeling in iliac bone, 163
Homeostasis
Mineral, 25-hydroxyvitamin D-1α-hydroxylase gene mutation and, 332
Skeletal, estrogen role in, postmenopausal women, 185
Hormone replacement therapy
Bone structure and physical performance in postmenopausal women and, 704
25-Hydroxyvitamin D-1α-hydroxylase gene
Mutation, vitamin D deficiency rickets and, 332
Hypercholesterolemia
Simvastatin effects on bone mineral density in, postmenopausal women, 427

Ibandronate
Bone loss prevention role, after ovariectomy, 45
Bone turnover markers and, 687
Osteoporosis prevention/treatment efficacy, in postmenopausal women, 421
Iliac bone
Trabecular minimodeling in, 163
Image analysis
Growth hormone effects on early healing phase of osteochondral defects, 457
Infection
Implant-related, gentamicin coating effects on development of, 521
Insulin-like growth factor
Bone formation and, skeletal unloading effects on resistance to, 669
Early healing phase of osteochondral defects and, 457
Interleukin-6
Influence on osteoclast formation, 1
Interleukin-11
Influence on osteoclast formation, 1
Intramedullary vessel
Morphology in tibial metaphysis during ovariectomy-induced bone loss, 630
IPTHrP secretion
Hedgehog role in, 611

JNK-AP-1 signal transduction pathway
Osteosarcoma pathogenesis and progression and, 364

Knee
Osteoarthritis, bone mineral density as predictor of joint space narrowing at mediofemorotibial compartment in, 541

Lipoproteins
Changes in, in Paget's disease treated with pamidronate, 15

Mandible
Cortical bone, CT role in quality assessment, 35
Matrix Gla protein
Accumulation in bone and cartilage, bone mineralization inhibition and, 201
Mechanical loading
During bone turnover, 350
Estrogen effects on female skeleton response to, 642
Mechanical properties
Bone mineralization density distribution in cancellous bone and, 316
Men
Hip strength, gender, anthropometry, and aging effects on, 561
Menopause
Bone loss at, osteoporosis development and, 357
Microcomputed tomography
Epiphyseal growth plate fusion in tibia, time course of, 261
Microstructure analysis
Apatite crystal organization in woven bone, 150
Mortality rate
After hip fracture, 468
Multiple sclerosis
1,25-dihydroxyvitamin D_3 role in bone loss and autoimmune encephalomyelitis prevention and, 397
Muscle strength
Hormone replacement therapy association with, postmenopausal women, 704

Nitric oxide
Bone mineral density effects, in estrogen deficiency-induced osteopenia, 142
Nitric oxide synthases
Ovariectomy-induced bone loss, vessel morphology in tibial metaphysis during, 630
Noggin
Stromal cell differentiation and, 111

Odontoblasts
Amelogenin expression in, 228
Organ culture
Perichondrium effects on chondrocytes during endochondral bone formation and, 27
Orthosilicic acid
Collagen type I synthesis and, 127
Osteoblastic differentiation and, 127
Osteoarthritis
Hip, femoral neck cancellous bone increase in, 86
Knee, bone mineral density as predictor of joint space narrowing at mediofemorotibial compartment in, 541
Subchondral bone histomorphometry changes in, 284
Osteoblast differentiation
Gene expression patterns during, 474
Hedgehog role in, 611
Orthosilicic acid effects, 127
Osteoblasts
Bone nodules in bone marrow stromal cells and, 252
CAMP early repressor and cAMP-protein kinase A signaling pathway in, 483
Estrogen effects on osteoprotegerin, RANKL, and estrogen receptor expression in, 136
Mechanical loading during bone turnover and, 350
Noggin effects on stromal cell differentiation and, 111
Proliferation, fluid flow shear stress stimulation of, 241
Skin fibroblasts expressing bone morphogenetic protein effects on bone repair and, 502
Osteocalcin
Matrix Gla protein role in bone mineralization inhibition, 201
1,25$(OH)_2D_3$ effects on, in carbon tetrachloride-induced liver cirrhosis, 275
Vascular endothelial growth factor expression during bone healing and, 491
Osteochondral defects
Early healing phase, growth hormone effects on, 457
Osteoclastogenesis
1α,25-dihydroxyvitamin D_3 and receptor activator of nuclear factor expression and, 621
Osteoclasts
Bisphosphonate incorporation during bone resorption and, 341
Differentiation and function, protein kinase C-β role in, 217
Formation of, IL-6 and IL-11 influence on, 1
Function, cortical bone grafting and, 291
Mechanical loading during bone turnover and, 350
Proliferation of, transforming growth factor-β1 and, 297
Osteogenesis imperfecta
Alendronate effects on bone length and growth plate morphology in, 268
Osteomyelitis
Implant-related, gentamicin coating effects on development of, 521
Osteopenia
Estrogen deficiency-induced, nitric oxide effects on bone mineral density in, 142
Osteopontin
Collagen type III and, bone mass effects, exercise role in, 660
Osteoporosis
Adult growth hormone deficiency and, parathyroid hormone pattern, activity, and effects on, 170

Bone metabolism and, herbs, essential oils, and monoterpenes modulation of, 372
Bone resorption in, type I collage fragments as markers of, 20
Development of, bone loss at menopause and, 357
Estrogen effects on skeleton responsiveness to mechanical loading and, females, 642
Estrogen role in bone mass and skeletal homeostasis and, postmenopausal women, 185
Fracture, bone mineral density and, *COL1A1* Sp1 polymorphism relation to, meta-analysis, 711
Fracture discrimination, quantitative ultrasound role in, 571
Fracture risk in, dietary calcium and vitamin D intake and, 694
Fracture risk predictors, postmenopausal women, 78
Health-related quality of life and ambulatory care costs in, 718
Ibandronate role in prevention of, after ovariectomy, 45
Ibandronate treatment efficacy in prevention/treatment of, postmenopausal women, 421
Longitudinal changes in bone mineral density during pregnancy and, 449
Peak spine and femoral neck bone mass in young women and development of, 546
Public health issues, editorial, 327
Risk factors, quantitative genetic study of bone size and geometry, 191
Transforming growth factor-β1 gene polymorphism and, 297
Vertebral deformity in hip fracture and, 180
Vertebral fracture, growth hormone as predictor of bone density and, in postmenopausal women, 434
Vertebral fracture, risedronate efficacy in prevention, 120

Osteoprogenitor cell
Vascular endothelial growth factor expression during bone healing and, 491

Osteoprotegerin
Bone density determinant, vertebral fracture risk and, after cardiac transplantation, 96
Estrogen effects on, in osteoblasts, 136
Levels of, age effects on, 681

Osteosarcoma
Pathogenesis and progression of, JNK-AP-1 signal transduction pathway and, 364

Ovariectomy
Bone loss and vessel morphology in tibial metaphysis during, 630
Bone loss induced by, collagen type III/VI and, 652
Vibration effects on femur/tibia strength and, 69

Paget's disease
Bone density changes after 2-year pamidronate treatment, 56
Cholesterol changes after pamidronate treatment, 15

Pamidronate
Bone density changes and, in Paget's disease, 56
Cholesterol changes in Paget's disease after treatment with, 15
1,25-dihydroxyvitamin D_3 and, bone loss and autoimmune encephalomyelitis prevention and, 397

Parathyroid hormone
Anabolic action of, on cancellous and cortical bone, 513
CAMP early repressor in osteoblasts, 483
Pattern, activity, and effects on adult growth hormone deficiency, 170

Perichondrium
Effects on chondrocytes, during endochondral bone formation, 27

Periosteal circumference
Heritable components of, 554

Phosphorus
Calcium and, intake variations, growth and bone development effects, 532

Physical activity
Estrogen effects on skeleton responsiveness to mechanical loading and, females, 642

Physical performance
Hormone replacement therapy association with, postmenopausal women, 704

Polymorphism
Single nucleotide, Trp16Ser variation in gonadotropin-releasing hormone signal peptide association with, 185

Pregnancy
Bone mineral density longitudinal changes during, 449

Probe array
Gene expression during osteoblast differentiation and, 474

Protein kinase C-β
Osteoclast differentiation and function and, 217

***PTHrP* mRNA expression**
Hedgehog role in, 611

Quality of life
Health-related, ambulatory care costs and, in osteoporosis, 718

Quantitative trait loci
Heritable components of periosteal circumference, 554

Radiogrammetry
Quantitative genetic study of bone size and geometry, osteoporosis risk factors and, 191

Radiography
Spine, vertebral deformity in hip fracture and, 180

Receptor activator of nuclear factor
Expression of, 1α,25-dihydroxyvitamin D_3 and, 621

Receptor activator of nuclear factor κB ligand (RANKL)
Estrogen effects on, in osteoblasts, 136
Osteoclast formation and, 581

Research
Osteoporosis, public health issues, editorial, 327

Retroviral gene therapy
Bone morphogenetic protein-4-induced fracture repair, 591

Rickets
Vitamin D deficiency, 25-hydroxyvitamin D-1α-hydroxylase gene mutation and, 332

Risedronate
Osteoclast incorporation of during bone resorption, 341
Vertebral fracture prevention efficacy, osteoporotic women, 120

Safranin-O staining
Articular cartilage and subchondral bone histomorphometry in osteoarthritis and, 284

Shear stress
Osteoblast proliferation and, 241

Shock wave
Extracorporeal, fracture healing role, 387

Signal transduction
JNK-AP-1, osteosarcoma pathogenesis and progression and, 364

Silicon deficiency
Bone metabolism role, 127

Simvastatin
Bone mineral density and, hypercholesterolemic postmenopausal women, 427

Skeletal unloading
Effects on insulin-like growth factor resistance on bone formation, 669

Stromal cells
Bone marrow, bone nodules in, characterization of, 252
Differentiation of, noggin effects on, 111

Subchondral bone
Histomorphometry, changes in osteoarthritis, 284

Surgery
Gentamicin-coated implant effects on osteomyelitis development, 521

Tibia
Epiphyseal growth plate fusion in, time course of, 261
Vibration effects on strength, after ovariectomy, 69
Tissue engineering
Bone morphogenetic proteins role in bone formation and, 381
Tissue preservation
Methods of, cortical bone grafting and, 291
Transforming growth factor-β1
Osteoporosis and, 297
Trochanter
Longitudinal changes in bone mineral density during pregnancy and, 449
Tumor markers
JNK-AP-1 signal transduction, osteosarcoma pathogenesis and progression and, 364

Ultrasound
Quantitative, role in fracture discrimination, in osteoporosis, 571

Vascular endothelial growth factor
Expression of, during bone healing, 491
Vertebra
Bone loss in, cholesterol role, postmenopausal women, 8
Deformity, prevalence of in hip fracture, 180
Vertebral fracture
Bone mineralization levels and, 311
Growth hormone as predictor of bone density and, in postmenopausal women, 434
Osteoprotegeron as bone density determinant and, 96
Risedronate efficacy in prevention, 120
Vibration
Femur/tibia strength effects, after ovariectomy, 69
Vitamin D
Amelogenin regulation by and expression in odontoblasts, 228
Dietary calcium and, effects on fracture risk in osteoporosis, 694
Osteoprotegerin levels and, age effects on, 681
Pamidronate and, bone loss and autoimmune encephalomyelitis prevention and, 397
Vitamin D deficiency rickets
25-hydroxyvitamin D-1α-hydroxylase gene mutations and, 332

Women
Breast cancer risk, bone mineral density and, 211
Osteoporotic, risedronate efficacy in vertebral fracture prevention, 120
Peak spine and femoral neck bone mass in, osteoporosis development and, 546
Women, postmenopausal
Estrogen role in bone mass and skeletal homeostasis, 185
Fracture risk predictors in, 78
Hip fracture, mortality rate after, 468
Hormone replacement therapy association with bone structure and physical performance in, 704
Hypercholesterolemic, simvastatin effects on bone mineral density in, 427
Ibandronate role in changes in bone turnover markers, 687
Ibandronate treatment efficacy in osteoporosis prevention/treatment, 421
Vertebral bone loss, cholesterol role in, 8

Young's modulus
In mandible, CT role in quality assessment, 35
